

Marco Procopio

Fullstack Developer | Remote, EU-based

 Milan, Italy  procopiomarco@protonmail.com  JustMarkDev  Marco Procopio  Just Mark

PROFESSIONAL SUMMARY

Fullstack Developer delivering end-to-end TypeScript and React products, from relational modeling and REST APIs to accessible interfaces with perfect Lighthouse scores. Fully remote from Italy with an AI-augmented workflow and 368-plus automated tests across projects, pairing fast delivery with performance-first engineering.

SOFTWARE ENGINEERING PROJECTS

Database Contatti

Independent project - Contact management and enrichment application

- Made contact search feel instant on a big local catalogue: a page back in **about 50 milliseconds** from **about 100,000 contacts**, using SQLite full-text search in a Tauri and React desktop app.
- Kept huge file imports responsive: **nearly 180,000 email candidates from a 25 MB file in about 4.5 seconds**, with chunked SQLite writes and background workers.
- Exported a full contact list without waiting: **about 100,000 CSV rows at about 340,000 contacts per second**, streaming out of the local SQLite store.

Sergio Procopio

Independent project - Web platform development

Live site

- Replaced a locked WordPress site with one the owner can edit without code, scoring a perfect **100/100 PageSpeed** on **15 public pages**, built with Astro, React, and Tailwind.
- Brought in work: **more than 20 contact requests** from about 180 visitors and 800 page views, via a type-safe contact form and real email delivery.

Satisfactory Start Optimizer

Independent project - Web dashboard and API development

- Made full-map start search feel instant: **about 16 milliseconds** over **about 9,000 nodes**, with a hybrid Rayon search behind a small web app and API.
- Kept weight scrubbing snappy at **about 5 milliseconds** multi-start, with the **2.6 MB** map loading in **about 3.5 milliseconds**.

TECHNICAL OPERATIONS EXPERIENCE

Audio and Lighting Technician

2021 - Present

Teatro Procopio - Milan, Italy (Part-time)

- Set up, independently operated, and dismantled speakers, halogen and LED lights, DMX signals, and mixer-based audio during live performances.
- Proposed the move from halogen to LED lighting, reducing power consumption and cable complexity and eliminating recurring power trips, and diagnosed faults live during shows.

EDUCATION

University of Milan-Bicocca

Milan, Italy

Computer Science Studies

2022 - Present

Enea Mattei Technical Institute

Sondrio, Italy

Technical Diploma in Computer Science and Telecommunications

2017 - 2022

LANGUAGES AND TECHNICAL SKILLS

Italian: Native / **English:** C2

Fullstack Web: TypeScript, JavaScript, React, Next.js, Astro, Node.js, REST, API integration

Data: SQL, SQLite, MySQL, rusqlite, HTTP, JSON, serverless functions, Vercel Functions

UI and Performance: Tailwind CSS, Base UI, responsive design, web accessibility, Lighthouse, performance profiling

Quality and AI Workflow: Vitest, Playwright, unit testing, end-to-end testing, Claude Code, AI-assisted debugging, test generation
